

SUMIMARK® SR

MARKING RIBBON FOR USE WITH SUMIMARK MODEL I & II SYSTEMS

RoHS Compliant

FEATURES

- 1) SUMIMARK SR is a pigmented ribbon that features optimum thermal transfer characteristics for use on Sumimark I & II Marking Systems. *Sumimark SR ribbon is not compatible with Sumimark III or IV systems.*
- 2) SUMIMARK SR black ribbon, when used in conjunction with the Sumimark Marking System and tubing, provides marks that, after shrinking, meet or exceed the print adherence requirements of SAE-AS5942. This standard replaces the cancelled SAE-AS81531 standard.
- 3) SR marking ribbon will yield exceptionally clean alphanumeric, barcoding, or graphics markings.
- 4) SR Ribbon is free from coating voids, skips, wrinkles, or other conditions which would adversely affect the transfer integrity.

Standard Widths: 1.5", 2.0"
